What aspects of this course do you find most valuable and challenging, and why?

I really enjoyed getting to work on real client projects and build a portfolio while I did so. Some of the most challenging yet rewarding work was getting to make projects and work on a team which gave me a really good understanding of what the actual working world will be like.

This course helps me reflect on my internship and prepares me for the future.

I learned so much from my internship experience being able to be hands-on and really learn more as I go and create and learned some good lessons and tools

Are there specific resources or opportunities you wish had been available to you in this course?

No, I had easy access to all of the potential resources I could have taken advantage of.

No

This internship was providing a real print production, while limited by budget, it would be cool to be able to go above and beyond on the creative things we want to include or do, but with economy and rising prices that became hard that we had to snap back into reality of what we could actually fit in budget

If applicable, describe how this course has influenced your future academic, personal, or professional goals.

I have discovered from this internship that I love working on bigger projects and especially for clients. I think it would be great to work in a very similar industry professionally and for a longer period of time.

This helps me reflect on my work and environment with my boss during the internship, and prepares me to update my portfolio.

I got to really do more of a deep dive into indesign and creating a physical product, but also handling the managing portion of it really shaped the way I think about projects and how I can lead and talk to multiple facilities to be able to produce the project from initial concept to full print production
